Black Plants Paul Bonine,2009-01-01 These are all words that describe the singular appeal of plants with black (or near-black) foliage, flowers, or fruit. For some gardeners, they are curiosities that yield a special thrill when closely examined. For others, they are invaluable for creating sophisticated designs in which dark leaves and foliage provide essential contrast with brighter elements. Whatever the source of their somber magic, these dusky denizens of the plant kingdom are irresistible to gardeners-or indeed to anyone drawn to nature's more unusual manifestations.

*The Artisan Jewish Deli at Home* Nick Zukin, Michael Zusman, 2013-09-03 For Jewish deli devotees and DIY food fanatics alike, *The Artisan Jewish Deli at Home* is a must-have collection of over 100 recipes for creating timeless deli classics, modern twists on old ideas and innovations to shock your Old Country elders. Photographs, historical tidbits, reminiscences, and reference material round out the book, adding lively cultural context. Finally, fifty years after I started eating pastrami sandwiches and knishes at Wilshire's Deli in Cedarhurst, Long Island, Nick Zukin and Michael C. Zusman have written a cookbook that allows delicatessen enthusiasts to make their favorite deli dishes at home. Making your own knishes? No problem. Rustle up your own pickles? Bring it on. Michael and Nick manage to make deli food simultaneously contemporary and timeless, which is no easy feat. If reading *The Artisan Jewish Deli at Home* doesn't make you hungry, you've never rhapsodized over a pastrami sandwich or driven a hundred miles for a transcendent plate of latkes. If my grandmother, the greatest Jewish deli-style cook I've ever known, were alive she'd be kvelling over this book." —Ed Levine, founder of *Seriouseats.com* "Michael and Nick's handsome book brings some of your favorite deli recipes and memories into your home kitchen. Their pickles, knishes, and pastrami are just like you remember, only better!" —Joan Nathan, author of *Jewish Cooking in America* "Before you open this book, be sure to crack a window, because your house will soon reek of the glorious funk of delicatessen. The mouthwatering scent of baking bagels, bubbling soups, and steaming pickled meats will conquer every square inch of available air, bathing it all in a rich, delicious patina of schmaltz. Don't be surprised if a sarcastic waiter named Abe appears in your kitchen. *The Artisan Jewish Deli at Home* will turn any house into a delicatessen worth its weight in knishes." —David Sax, author of *Save the Deli* If you don't happen to live near one of the new wave of artisan-style Jewish delis that have sprung up around North America over the last few years, not to worry. With this book, the world of Jewish deli, in all its unsubtle splendor—can be yours in the comfort (and privacy) of your own kitchen. And it's not that hard. Really. On top of all the Jewish deli classics, *The Artisan Jewish Deli at Home* offers updates and new angles on the old ways that are bound to thrill the palates of a modern generation of eaters focused on quality ingredients and a lighter-handed approach to a traditionally heavy cuisine. The chapters are organized into: Starters and Sides; Soups and Salads; Eggs, Fish, and Dairy; Beef; Bagels, Bialys, and Breads; and Pastries, Desserts, and Drinks. The range of favorite recipes include: Crispy Potato Latkes with Chunky Ginger Applesauce; Summer Chicken Salad with Tomatoes, Cucumber and Cracklings; Wise Sons' Chocolate Babka French Toast; Home Oven Pastrami; and Celery Soda. Added cultural context comes from quick-hitting

interviews with Joan Nathan and other Jewish food luminaries; histories of a few deli stalwarts such as bagels and pastrami; and first-hand reports from within the walls of the authors' favorite temples of modern Jewish gastronomy located across the country including: Mile End Delicatessen in New York City; Wise Sons Delicatessen in San Francisco; Kenny & Zuke's Delicatessen in Portland, OR; Stopsky's Delicatessen in Mercer Island, Washington; and Caplansky's Delicatessen in Toronto.

The Older Prisoner Diete Humblet, 2021-01-23 This book critically explores the world of older prisoners to provide a more nuanced understanding of imprisonment at old age. Through an ethnographical study of male and female older prisoners in two Belgian prison settings, one in which older prisoners are integrated and one in which they are segregated, it informs debates and seeks to recognise ageist discourse, attitudes, practices in prison. The Older Prisoner seeks to situate the older prisoner from both a penological and gerontological perspective, organised around the following broad themes: the construction of the older prisoner, the physical prison world, the social prison world, surviving prison and giving meaning. The book allows readers to navigate between contrasting perspectives and voices rather than reinforcing traditional narratives and prevailing discourses on the older prisoner. In doing so, it hopes to open up a broader dialogue on ageing and punishment. It also offers insights into the concept of meaning in life as an analytical tool to study prisoners.

**International Protection of Investments** August Reinisch, Christoph Schreuer, 2020-06-30 This book outlines the protection standards typically contained in international investment agreements as they are actually applied and interpreted by investment tribunals. It thus provides a basis for analysis, criticism, and stocktaking of the existing system of investment arbitration. It covers all main protection standards, such as expropriation, fair and equitable treatment, full protection and security, the non-discrimination standards of national treatment and MFN, the prohibition of unreasonable and discriminatory measures, umbrella clauses and transfer guarantees. These standards are covered in separate chapters providing an overview of textual variations, explaining the origin of the standards and analysing the main conceptual issues as developed by investment tribunals. Relevant cases with quotations that illustrate how tribunals have relied upon the standards are presented in depth. An extensive bibliography guides the reader to more specific aspects of each investment standard permitting the book's use as a commentary of the main investment protection standards.

Vegetation of Central Asia and Environs Difuza Egamberdieva, Münir Öztürk, 2018-12-19 Central Asia is a large and understudied region of varied geography, ranging from the high passes and mountains of Tian Shan, to the vast deserts of Kyzyl Kum, Taklamakan to the grassy treeless steppes. This region is faced with adverse conditions, as much of the land is too dry or rugged for farming. Additionally, the rich specific and intraspecific diversity of fruit trees and medicinal plants is threatened by overgrazing, oil and mineral extraction, and poaching. Countless species from the approximately 20 ecosystems and 6000 plant taxa are now rare and endangered. Traditional vegetation studies in this region are far from adequate to handle complex issues such as soil mass movement, soil sodicity and salinity, biodiversity conservation, and

grazing management. However, data analysis using a Geographical Information System (GIS) tool provides new insights into the vegetation of this region and opens up new opportunities for long-term sustainable management. While vegetation planning can occur at a property scale, it is often necessary for certain factors, such as salinity, to be dealt with on a regional scale to ensure their effective management. GIS increases the effectiveness and accuracy of vegetation planning in a region. Such regional planning will also greatly increase biodiversity values. This book systematically explores these issues and discusses new applications and approaches for overcoming these issues, including the application of GIS techniques for sustainable management and planning. Professional researchers as well as students and teachers of agriculture and ecology will find this volume to be an integral resource for studying the vegetation of Central Asia.

Heart of Dryness James G. Cookbook is filled with 250 strikingly original recipes, many of them annotated with fascinating stories about the customs and cultures from which they derive. Whether they're classic dishes or brand-new discoveries, all the recipes have been thoroughly tested and adapted for the modern kitchen. **Rise and Fall of the Carbon Civilisation** Patrick Moriarty, Damon Honnery, 2014-10-01 A vast amount has been written on climate change and what should be our response. Rise and Fall of the Carbon Civilisation suggests that most of this literature takes a far too optimistic position regarding the potential for conventional mitigation solutions to achieve the deep cuts in greenhouse gases necessary in the limited time frame we have available. In addition, global environmental problems, as exemplified by climate change, and global resource problems -- such as fossil fuel depletion or fresh water scarcity -- have largely been seen as separate issues. Further, proposals for solution of these problems often focus at the national level, when the problems are global. The authors argue that the various challenges the planet faces are both serious and interconnected. Rise and Fall of the Carbon Civilisation takes a global perspective in its treatment of various solutions: • renewable energy; • nuclear energy; • energy efficiency; • carbon sequestration; and • geo-engineering. It also addresses the possibility that realistic solutions cannot be achieved until the fundamentally ethical question of global equity -- both across nations today

and also inter-generational – is fully addressed. Such an approach will also involve reorienting the global economy away from an emphasis on growth and toward the direct satisfaction of basic human needs for all the Earth's people. Rise and Fall of the Carbon Civilisation is aimed at the many members of the public with an awareness of climate change, but who wish to find out more about how we need to respond to the challenge. It will also be of interest to technical professionals, as well as postgraduate students and researchers, from the environmental and engineering science sectors.
